PRICE AND STYLE GUIDE
2016

PROCESS

Start the process by contacting Sparetire Design and let us know what you are looking for along with the date of your event, design choices and event details.

LET'S CHAT

Through email, skype or in person meeting, we will discuss the details of your order. Once the project has a concise scope, a form/contract will be emailed to you. Upon receipt of the complete form, a \$50 deposit is required.

All designs shown on our website can be customized with your wedding colors and choice of fonts. Most designs can be made into any style invitation you desire. We want your wedding invitation not only to meet but to exceed your expectations. Custom (Bespoke) design is also available!

PROOFS

Design work begins. If you are personalizing one of our designs, you will receive the design in your color and style choice based on our discussions. If you are taking advantage of our custom design services, several unique and carefully designed ideas with you in mind will be sent for your review.

REVISE AND APPROVE

Edits and revisions are welcome until you are satisfied. Sparetire Design is not responsible for errors found after approval, it is important to proof read to ensure everything is correct. Sign and return approved proofs.

PRINT & DELIVERY

Payment is due in full at time of final approval. Your order will be carefully printed, cut and assembled. When complete they will be hand-packed and shipped, and a tracking number will be provided. All items mailed USPS priority unless otherwise discussed and approved.

During this process we urge you to ask us anything and don't hesitate to express what you are looking for. We are here to guide you while satisfying your stationery needs.

We look forward to working with you!

PRINTING

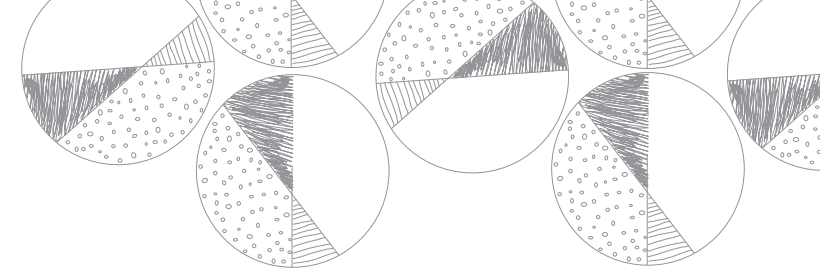

All our invitations are printed on professional printers. Our prices are based on digital offset printing processes. Digital offset printing is an affordable way of printing smaller runs. It is a four color printing technique that offers sharp, crisp lines and a uniformity through each piece. The results are beautiful and your color choices are unlimited.

If you have room in your budget for special printing processes, you may want to consider letterpress or engraving. Letterpress creates an impression into the paper, producing an appealing texture. Each piece is pressed individually creating a unique variation of ink coverage and impression of depth. Engraving is the opposite of letterpress, the result being a raised texture. This is the traditional printing process for formal invitations. Like letterpress, each piece is pressed individually. Simply exquisite, letterpress and engraving printing have a rich, warm feel that one can't help but appreciate.

PAPER

The texture, finish and quality of the paper choice is crucial to setting the right tone for your event. We use quality suppliers and offer several different textures, colors and specialty papers. Our prices are based on matte, linen and felt papers. Metallic and patterned papers are available but will incur an additional price. We will always let you know if your material choice will effect the price and will be more than happy to discuss alternate materials to accommodate your desired stationery suite and your budget.

Sparetire Design is conscious of the footprint we leave on our earth; all our papers are at least 30% recycled, the majority being a higher percentage. All our packaging materials are carefully chosen and when possible reused. We recycle and compost all our scrap materials.

COLOR

Color plays a very important role in your stationery. The color choices can make a design feel bold; change the color and it can soften and romanticize the same design. Listed are popular color choices, if you don't see your preferred colors, we'll do our best to match a specific color for your wedding.

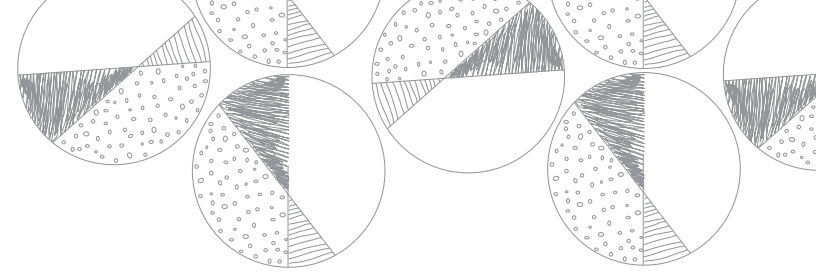

Be sure to pick colors that reflect you and your event. And never underestimate the power of classic color combinations. Black is always elegant and sophisticated. White on white is both contemporary and vintage. A bright color can be tamed with a pastel in the same color family, or a neutral, like gray, silver, cream or black.

Two color combinations are chic and contemporary. If you choose more than two colors, choose the one most important to you to be the star and let the others play a nice supporting role.
